

Course Description:

This program will review denture fabrication methods and demonstrate what techniques have changed. The latest in 3D printing processes and materials will be highlighted, demonstrating their strength, accuracy and aesthetics. Additionally this course will review clinical guidelines that make chairside steps easier to accomplish.

At the completion of this course participants will be able to understand:

- Clinical records – what is needed for success and how to obtain them
- Denture impressions – where we are today
- A simple systematic approach to a 3-appointment digital denture
- Denture fabrication methods and how current CAD-CAM technologies have improved them
- The latest 3D printed denture materials that are stronger than anything ever used
- Utilizing a functional try-in and why it's better
- Removable clinical tips and tricks for a less stressful experience and result

Featured speaker

Jimmy Stegall is a seasoned dental lab operations and management executive with over 38 years of field, teaching, and clinical experience in the US and Canada. He is a published author and has assisted in research projects with dentists, universities, and manufacturers. After a successful 30+ year career helping build and lead a large dental lab in South Carolina, Jimmy served as a division President of a large dental lab group, and is now National Accounts Strategy Manager for Dentsply Sirona Implants and Prosthetics divisions.

Speaker Disclosure: This speaker is employed full time by Dentsply Sirona.

Next Level Dentures - In 3 Appointments
